SÉMINAIRES 2018

Ab-initio methods for electronic spectroscopy: Applications to bulk and layered semiconductors

1/2 Journée séminaires ILF - juillet 2018

Quantum networks based on spin-photon interface in quantum dots

Cavity Spintronics

Oxide heterostructure with 10^5 % electroresistance at room temperature - Joseph Scola

Magnetic Materials Research at BC Materials - José Manuel Barandiaran

Optical and physical properties of AZO by MOCVD - Josef Gert Åsheim Ellingsen
